

The software standard for interactive teaching

Engage, Empower, Enjoy!

Interactive whiteboards, projectors and related technologies for interactive teaching are becoming a common sight in today's classrooms. But, as with any ICT resource, what really makes technology come to life is the quality of the software you use. Easiteach is such software and is fast emerging as the software standard for interactive teaching. What's more, Easiteach runs on any make of interactive whiteboard, minimising staff training and allowing you to standardise the software you use, even if your school has a range of different interactive whiteboards.

Why choose Easiteach?

To motivate and inspire pupils

- Engage and enthuse your class by creating exciting and flexible lessons.
- Involve your class by creating interactive resources.
- Create visual and animated models to demonstrate concepts and processes.
- Encourage effective questioning and group discussion.

To Help Teachers

- Easily create effective lesson resources.
- Save valuable time by sharing, adapting and re-using lesson activities.
- Share teaching activities with colleagues.
- Bring interactivity and creativity into lessons so even the most reticent of pupils will want to get involved.
- Enjoy lesson preparation!

To support the curriculum

- Tools and multi-media resources to use across an integrated Australian curriculum.
- Subject-specific tools available to teach Literacy, Maths, Science and Geography.
- Ready-made lessons and content available for Literacy, Maths, Science, Geography, English as an Additional Language.

Supporting your investment

- Easiteach runs on ANY make of interactive whiteboard.
- Standardise your whole-class teaching software.
- Standardise and save time and money on teacher training.
- Is suitable for both Primary and Secondary classrooms.

The Easiteach Family

A Flexible Family

Easiteach Studio is the foundation of the Easiteach family, it is powerful, versatile and easy-to-use software which enables you to get the most from any interactive whiteboard. And with Easiteach Studio you can also add subject teaching tools to support the teaching of Maths, Literacy, Science and Geography in an integrated Australian curriculum.

To these subject teaching tools, you can also add subject teaching content (teaching materials, lessons and resources) for Maths, Literacy, English as an Additional Language, Science and Geography. Each of these subject teaching content packs requires the relevant subject teaching tool.

Additional content packs are also available that do not require subject teaching tools: Animated Books, Early Steps in Literacy and Games.

Easiteach Studio

With Easiteach Studio it is easy and simple to move objects on screen, including text and video. But although it is easy to use, it is still powerful software with the ability to combine databases, spreadsheets, video and Flash™ files and animations all on the one page. Easiteach Studio means you can save interactive teaching materials for future use, or share with colleagues. Pupils love it too!

Easiteach Maths

Easiteach Maths Tools
These include number grids, place value cards, graphpaper, a 'number crunching' machine and picture resources – the tools you already use in the classroom but now on a whiteboard!

Easiteach Maths Content

Comprised of 289 lesson activities, 149 mental starters, 20 interactive teaching programs. All lesson plans are linked to leading Maths schemes such as Abacus, New Heinemann and Numeracy Focus.

Easiteach Literacy

Easiteach Literacy Tools
These include word and sentence builder cards, cloze creator, Big Edit (a tool to teach the editing process), writing frames and more. Tools for literacy teaching are now on a whiteboard!

Easiteach Literacy Content

Comprised of 85 lessons written by a team of leading literacy experts led by Dr David Wray and Dr Jane Medwell. The Easiteach Literacy Content Pack also contains 100 fiction and non-fiction texts, word banks and writing frames.

Easiteach Science

Easiteach Science Tools
These really bring Science to life with tools to connect to digital cameras, electronic microscopes; scaleable callipers for accurate onscreen measurement; tools to easily create scientific diagrams; stopwatches and timers.

Easiteach Science Content

Teach those hard-to-demonstrate concepts with the Easiteach Science Content Pack containing 18 simulations, 40 teaching activities, 60 concept cartoons and 12 video clips.

Easiteach Geography

Easiteach Geography Tools
Easiteach Geography Tools provide facilities such as grid overlays in a variety of sizes and a grid reference reader with 4- and 6- alphanumeric digit references, as well as a grid fill tool. Includes maps, map builder, pictures and many more tools

Easiteach Geography Content

includes 7 animated simulations, over 40 whole-class teaching activities, 8 games, 22 maps, over 250 photographs, an electronic atlas and 25 video clips, all with accompanying teaching notes.
