STOP loitering, graffiti, car accidents etc with instant alerting on existing CCTV

SecureMon Real-time Video Detective V4.1

SecureMon the national video specialists in the advanced video analysis market, have extensive expertise in applying leading video surveillance/alarm technology to meet the special needs of this marketplace.

The latest edition is Video Detective V4.1 which analyses live video from existing CCTV installations and sends an instant alert if suspicious or unacceptable behaviour occurs. This now enables organisations , in a cost effective way, to proactively stop serious incidents occurring, change behaviour and identify problem areas.

INSTANT ALERTING!!!

SecureMon Video Detective V4.1 incorporates a variety of analysis components including elements such as:

- **Anti-Loitering** (e.g. **Predators** hanging around toilets, doorways etc)
- **Anti Graffiti/Vandalism**
- Detecting **Vehicles** entering/leaving areas in wrong directions & over speed detection
- Blocking driveways , vehicles parking too long ,etc
- Secure Zone **Penetration** (e.g. areas no one should be in after hours)
- **Virtual Fencing** (e.g. climbing over fences, theft ,etc)
- **Object Removal** – Protecting voluble assets.
- And many more....

Upon an event occurring the system can alert via email, SMS etc. including options such as sending an alert with a picture of the incident as it's occurring. SecureMon can also integrate the alerting with Alarm Panels, LED Road Signs, PA speakers etc.

As SecureMon are the corporate/government audio/ video specialists they also offer a full range of:

- **Digital Signage** solutions
- Intelligent **whiteboards**
- **Audio/visual** products
- Conventional security solutions particualarly CCTV and alarm/access systems
